

THE LC PRIVACY GLASS SOLUTION

With the growing popularity of modern, open floor plan work environments, designing glass-enclosed conference rooms and offices has become a necessity. But with that comes the feeling of working in a “fishbowl.”

Switchable LC Privacy Glass walls, doors, and windows become “frosted” when you want privacy, and switch back to a transparent state at the flip of a switch, by mobile device, or voice command. When frosted, the glass blocks out visual distractions and keeps meetings private while allowing diffused light to pass through. Switched back to a transparent state, spaces are visually re-opened.

THE POSSIBILITIES ARE ENDLESS

Use LC Privacy Glass for: Conference Room Walls and Doors; Curtain Walls and Windows; Private Offices; Lobbies; Most Partition Systems; And so much more...

Innovative Glass offers many proprietary wiring solutions to incorporate our glass into all types of doors, including sliders, and it is easily installed into most partition systems. Since it is custom-produced, there are endless design options and configurations available.

LC PRIVACY GLASS FEATURES

- Easily integrates into AV systems
- Fits most Partition and Glazing systems
- Maintenance-free and durable
- Ideal for open concept designs
- Eliminates the need for shades and blinds
