

dynamic glass Smart Part(ition)

Innovative Glass Corp.'s privacy glass can be outfitted in an accordion wall system by Skyfold. According to Innovative, the combination of its glass and these partitions adds a new level of versatility to multipurpose areas, as the retractable partitions can enable spaces to be used in different configurations.

This system allows for any room to be divided by vertical-folding partitions. As a fully automatic moveable wall, Skyfold can be stored in the ceiling cavity to maximize floor space.

Pleotint's self-tinting Suntuitive Glass has received a bird-friendly label from the American Bird Conservancy (ABC). According to ABC, Suntuitive has a low material threat factor, enabling it to meet requirements for LEED Pilot Credit 55: bird collision deterrence, which recognizes creatively designed buildings that deter bird collisions.

Approximately one-third of bird species are in significant decline and are on the verge of becoming endangered, and according to ABC, windows are the third leading cause of population decline, trailing only loss of habitat and competition with invasive species.

hardware Gaining Senses

C.R. Laurence's electric strike with bolt position sensor can notify security and facility managers electronically if the doors on the premises are not properly closed and locked.

NOTE: Sensor feature available on ESP models only.

The product has been cycle-tested for reliability and utilizes UL-listed components. It is suitable for $\frac{1}{2}$ -inch to $\frac{3}{4}$ -inch tempered glass doors and features a fail-secure latch with fail-safe as an option. The electric strike with bolt position sensor is compatible with most building security and fire safety systems, according to the company. It permits the use of card readers, RFID badges and remote door monitoring and control.
