# HOW COOL IS YOUR VU?

## TRANSITIONAL WINDOW FILM

**CoolVu Window Films** “transition” from a lighter to a darker tint when exposed to sunlight. On bright sunny days, CoolVu reacts to the sun’s intensity and darkens to reduce sun glare and heat gain. On cloudy, rainy days and at night, CoolVu remains unchanged preserving your views and maximizing available daylight.

### PROTECT AGAINST FADING

UV rays typically cause fading throughout your home. CoolVu Window Films will protect your furnishings, upholstery, rugs and other valuables from the harmful effects of the sun.

### STAY COOL, SAVE MONEY

Sunlight heats up a house, especially in the summer. CoolVu rejects the solar-generated heat permeating your windows and can reduce your cooling costs.

### EASY ON THE EYES

CoolVu reduces annoying glare on your computer, LCD or television, and creates a pleasant, soothing environment for work and play.

### PERSONAL SAFETY

Windows treated with window film are safer than untreated windows because they will help hold the glass together in the event of a breakage.

### PRODUCT PERFORMANCE

CoolVu Window Films are designed to appear natural while providing impressive, adaptive sun control.

CoolVu Window Films:

- Block 99% of UV radiation
- Block 80% of IR heat
- Transition up to 40%
- Control sun glare up to 70%

### WARRANTY

CoolVu Window Films are guaranteed for 5 years for photochromic reaction and 10 years not to blister, peel, turn purple or bubble.

### PROFESSIONAL INSTALLATION

Your film purchase includes installation by our highly-trained professionals. There’s nothing to worry about — we’ll take care of everything!

### CALL FOR A FREE SAMPLE

The best way to experience CoolVu Window Film is to see it for yourself. Call today and request a free sample. You’ll be amazed!
